SUMMARY

Experienced Roblox Game Developer specializing in Luau programming, modular scripting, and backend architecture. Delivered high-performance, engaging titles with 1M+ plays across 6 years of full-cycle game development.

EXPERIENCES

Sunday Studios.

Jakarta, Indonesia

Core Gameplay Programmer

Jul 2025 — Present

- Engineered complex backend systems and gameplay loops (e.g., Economy System, Mini-Games framework) facilitating a seamless social hub environment.
- Spearheaded technical optimization, reducing memory usage by 30% and improving frame rates across low-end mobile devices to ensure broad market accessibility.
- Successfully launched the game achieving 1M+ visits within the first quarter, with a sustained 38K MAU (Monthly Active Users) and consistent Day-1 retention above 10%.
- Collaborated directly with UI/UX designers to implement responsive interfaces, bridging the gap between design concepts and technical functionality.

Topic Indonesia

Jakarta, Indonesia

Roblox Game Developer (Contract/Freelance)

Dec 2020 — Nov 2024

- Developed core systems (AI Pathfinding, Inventory, Multiplayer Replication) for horror titles including The Monox and ROHANGAN.
 - Contributed to a successful launch strategy that generated over 1M Robux in studio revenue within two months.
 - Standardized the codebase by creating reusable script modules, reducing development time for future updates by 40% and simplifying team collaboration.
-
